CAREER OBJECTIVE

Diligent professional with 3+ years of experience and a proven knowledge of product design, productivity improvement, and root cause analysis.

EXPERIENCE

SOFTWARE ENGINEER

Intel, Portland, OR / Jan 2020 - Present

- Providing on-call support to solve challenging automation issues for Intel's primary factory research & development facility to ensure factory production quality and output.
- Creating observability solutions for complex factory automation systems using custom scripts and the Elastic stack.
- Working with customers to troubleshoot issues and come to quick resolutions. Bridging the gap between customer and developer when necessary.

SOFTWARE DEVELOPMENT INTERN

Intel, Portland, OR / Jun 2018 - Jan 2020

- Developed test automation software for Bluetooth and WiFi technology.
- Maintained and contributed to continuous integration software. Provided support and bug fixes for teams across multiple geos.
- Developed custom automation software and GUI applications for driver and hardware validation and certification.

HELP DESK VOLUNTEER

Computer Action Team - PSU, Portland, OR / Oct 2017 - Jun 2018

- Provided systems administration for the Maseeh College of Engineering and Computer Science through upkeep of systems. Helped students and faculty with technical issues.
